

TEK30 HEIGHT ADJUSTABLE FOUR LEG DESK FRAME

Elegant · Versatile · Ergonomic

Versatility – Made Simple

The TEK30 height-adjustable frame is elegant yet versatile. It serves primarily as a utility desk for managers and executives in traditional office space. But it fits easily in other, less-conventional settings including home offices, reception areas, workshops, and dining rooms. Integrating functionality into furniture, the TEK30 delivers numerous ergonomic and multi-purpose possibilities for various environments.

Ergonomics on Demand

At Work

TEK30 is an ideal solution for meeting rooms, enhancing your space used for reception, interviews, and all types of collaboration. With easy adjustment of table height, users can quickly shift from a seated conversation to a standing meeting facilitating dynamic teamwork.

Out of Office

The TEK30 is multifunctional, supporting a variety of different uses at home. In addition to a conventional working desk, it can easily transform into an elegant dining table or kitchen counter.

Optional Cable Tray

Effortlessly manage a tangled mess of cables underneath by incorporating the optional tray. Since the cable tray can be easily opened and closed for easy access, without the use of tools, you can keep all your cables organized and hidden to modernize your space.

Embedded Hand Control

A variety of options for embedded hand controls allow for seamless installation into a tabletop, providing a clean, elegant appearance, making the TEK30 the statement piece of any room.
